DETAILED ACTION

- 1. Claims 1 and 3-19 are presented for examination. Claims 6-10 and 16-19 are withdrawn from further consideration as being drawn to a non-elected invention.
- 2. The text of those applicable section of Title 35, U.S. Code not included in this action can be found in the prior Office Action.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 11 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (Kim), U.S. patent no. 5,648,953 in view of Applicant Admitted Prior Art (AAPA).

As per claim 11, Kim teaches a method comprising the steps of:

receiving a first activity flag value from a first activity latch [flip flop 12, fig. 4] of a first line card circuit [fig. 4];

receiving an incoming clock signal [MCK];

providing an outgoing clock signal [output of AND gate 13] as the synchronization source dependent on the first activity flag value [col. 5, lines 25-33, col. 12, lines 6-16].

an activity latch [flip flop 12, fig. 4] for holding an activity flag value; and

a logic element [AND gate 13, fig. 4] operatively coupled to the activity latch to receive an incoming clock signal [MCK] and to provide an outgoing clock signal [output of AND gate 13], the outgoing clock signal being dependent on the activity flag value [col. 5, lines 25-33, col. 12, lines 6-16].

Kim does not explicitly teach a plurality of line card circuits.

AAPA teaches a method for selecting a synchronization source among a plurality of line card circuits [page 2, lines 8-29].

It is obvious to one of ordinary skill in the art to combine Kim and AAPA because the specific teaching of AAPA would improve the functionality of Kim system to implement the specific teaching of Kim in AAPA system.

As per claim 13, Kim teaches of passing the incoming clock signal as the outgoing clock signal when the first activity flag value has a passing value [col. 5, lines 25-33, col. 12, lines 6-16].

As per claim 14, Kim teaches of blocking the incoming clock signal when the first activity flag value has a blocking value [col. 5, lines 25-33, col. 12, lines 6-16].

As per claim 15, Kim teaches of providing a static output level as the output clock signal when the first activity flag value has a blocking value [col. 5, lines 25-33, col. 12, lines 6-16].

Allowable Subject Matter

5. Claims 1 and 3-5 are allowed.

09/636,115 Art Unit: 2115

6. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed on 10/9/2007 have been fully considered but are most in view of new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chun Cao whose telephone number is 571-272-3664. The examiner can normally be reached on Monday-Friday from 7:30 am-4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on 571-272-3667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is 571-272-2100.

09/636,115 Art Unit: 2115

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
